edwardsvacuum.com/service

Our experienced vacuum specialists are ready to carry out routine maintenance, troubleshooting, repair and commissioning of your vacuum equipment anywhere in the world, bringing best practice solutions directly to you.

SERVICE SOLUTIONS FOR VACUUM PUMPS

Expertise you can trust

Our knowledgeable technicians use the currently best known methods to deliver commissioning, troubleshooting and routine maintenance based on your needs. We invest in tools training and inventory that enable our team of vacuum specialists to deliver quality service in a safe and consistent manner.

Maximising lifetime

Maintenance performed by our vacuum specialists keeps your operations running smoothly as they are able to anticipate potential problems before they occur. Many issues can be corrected before causing irreversible damage. This helps to maximise the performance of your pump over its lifetime and avoid expensive repair.

Reliability and constant productivity

All services are conducted by vacuum specialists according to the manufacturer's recommendations, using genuine Edwards spare parts and oils. This enhances your vacuum pump performance, reducing the risk of downtime and enabling your production to run more smoothly.
